EXPERIENCE

Software Engineer

Dayforce (formerly Ceridian)

Toronto, ON

Jan 2025 - April 2025

- Contributed **7** components and **10+** bug fixes on the new Everest Design System using **Kotlin** and **Jetpack Compose**, which is used in Dayforce's Android App with over **1.2 million** daily unique users.
- Implemented and reorganized a **new Icon library** with **150+** icons for use across the design system's dark mode
- Utilized Android Studio **profiling** tools to benchmark build times of the Android app across Intel and Apple chips
- Worked directly with Design and QA teams to refine expected look and behavior of components

Software Engineer

Poket

Toronto, ON

May 2024 - Aug 2024

- Added **3** features and **5+** bug fixes on the Poket **Android** app using **Java** and **XML**, readying the app for user demos.
- Created **UI tests** for major application flows with Android **Espresso**, resulting in a **70%** increase in test coverage
- Used **profiling** tools to monitor CPU and RAM, fixing bugs in the log-in flow and reducing CPU spikes by over **50%**.
- Implemented a **Lambda** function using **AWS SAM** and **Python** to handle backend logic for a new **API**, enabling users to update various task attributes, such as engagement codes.

Software Engineer

SQM Janitorial Services

Toronto, ON

Sept 2023 - Dec 2023

- Authored a field staff management app using **React**, achieving streamlined operations and improved task reporting, which received positive feedback from staff.
- Enhanced online presence with a new booking system and UI, leading to a **25%** increase in bookings and retention.
- Configured and launched an **AWS EC2** web server, enhancing website reliability and response time by **40%**.

Software Developer

Tjene Corporation

Toronto, ON

May 2023 - Aug 2023

- Individually developed Kurve Layouts, an enterprise data visualization software used by **20+** client companies
- Contributed **15 React** components to the core UI library to improve brand consistency and reduce code duplication
- Overhauled legacy REST API to **GraphQL** API, reducing network load by **35%** and boosting app responsiveness.

Full Stack Developer

Heka Health/Santé

Montréal, QC

Sept 2021 - Dec 2021

- Implemented Heka's new **React front-end** following their rebranding, resulting in **90%** user satisfaction
- Integrated **Google Geocoding and Maps APIs**, increasing searches by **30%** and physio matches by **50%**.
- Created a **video conferencing** feature with **Jitsi Meet** and **Sequelize** used by **50+** physios with clients
- Created a responsive **chat interface** and an **API** to handle automatic responses to various user messages

PROJECTS

- Lister (Repo)**: MERN app for organizing daily tasks with to-do lists | **MongoDB, Express.js, React, Node, Auth0**
- Personal Website (Link)**: interactive personal website with animation and light/dark modes | **React, Javascript**
- UWRizz (Repo)**: a dating app made exclusively for UWaterloo students | **Kotlin, Compose, Firebase, Ktor**

EDUCATION

University of Waterloo

Honours Bachelors of Computer Science (Co-op)

Waterloo, ON

2020-2026 (Expected)
